Exercise: High-fidelity design prototype

Overview:

In this exercise, you will add the interactive components created in the previous activity to the file provided and link the two pages.

Step 1

- Open the Figma file called "Prototype" as well as the interactive components file you previously created.

📎 **C7.M4.L3.item 6 exercise prototype**
FIG File

Step 2

- Copy and paste the interactive components into the prototype file.

Step 3

- The components will show up on the assets panel.

Step 4

- Add an instance of the button component to replace the Checkout button.

Step 5

- Link the pages.
- Move from the design mode into the prototype mode.
- Select the item description frame button and drag the blue icon to the pre-order confirmation screen.
- The user may want to return to the previous page, so link the back arrow on the top left of this screen to the item description page.

Step 6

Test it by selecting the presentation mode button.
